

CH34X USB-SERIAL DRIVER INSTALLATION INSTRUCTIONS

Version:V1.0

Copyright (C) Jiangsu Qinheng Co., Ltd.

Support System:

OSX 10.9 and above

Installation Process:

Extract the contents of the zip file to a local installation directory

Double-click CH34x_Install.pkg

Install according to the installation on procedure

Restart after finishing installing

After the installation is completed, you will find serial device in the device list(/dev/tty.wchusbserial*), and you can access it by serial tools.

If you can't find the serial port then you can follow the steps below:

1. Open terminal and type 'ls /dev/tty*' and see if there is a device like tty.wchusbserial;
2. Open 'System Report' -> Hardware -> USB, on the right side "USB Device Tree" there will be a device named "Vendor-Specific Device" and check if the Current is normal.

If the steps above don't work at all, please try to install the package again.

Note:

Please enter "System Preferences" -> "Security & Privacy" -> "General", below the title "Allow apps downloaded from:" you should choose the choice 2 -> "Mac App Store and identified developers" so that our driver will work normally.
